

Community Partner Referral Program

How It Works

Your organization gathers client contact information (including first and last name, phone number and/or email address) for anyone interested in applying for SNAP.

Next our SNAP Outreach Team will reach out to the individual at least twice, the first of which will be completed no later than 2 business days after receiving the client's contact information.

Then pertinent details including outcome of each referral are shared with your organization (i.e., application submitted, unreachable, general questions) for tracking purposes by both parties.
